

**QUESTIONS****FORMFIRE****PAPER**

---

**Can I be sure that I'm getting the best rates available for my company?**

---

**YES.**  
FormFire's breakthrough technology uses one online survey to create every major carrier's application.

---

**No.**  
Unless you fill out every carrier's application, there is no way to be sure that you are getting the best rates possible.

---

**How much paper will I have to collect and organize?**

---

**NONE.**  
Employees create their own password-protected accounts, and no actual paper is generated.

---

**ALL OF IT.**  
This can be time-consuming, and involves holding onto employees' sensitive personal health information.

---

**How do I check to see who has finished their applications?**

---

**WITH THE CLICK OF A BUTTON.**  
You can see a list of which employees have completed all the questions.

---

**THERE IS NO EASY WAY.**  
Checking to see who is done is a headache, and some people don't even answer all of the questions.

---

**Is my health information stored/transferred in a HIPAA-compliant way?**

---

**YES.**  
FormFire creates a secure, encrypted digital transfer only into the hands of the people who need it.

---

**NOT ALWAYS.**  
Applications that are sent via e-mail are not always secure, and they go through many hands.

---

**Is the information stored so that I don't have to enter it again next year?**

---

**YES.**  
Everything you entered this year is securely stored, so you won't have to enter it again next year.

---

**No.**  
Every year means starting from scratch and re-filling out the applications again.
